Profile

I'm a Systems and Networks Engineering student with experience in web development, both front- and back-end, and a keen interest in design. I'm proficient in languages such as HTML, CSS, JavaScript, PHP, and Python, as well as tools and frameworks such as Node.js, Vue.js, and Django. I have experience in hardware and software maintenance in Windows environments. I stand out for my ability to work in a team, my willingness to collaborate, and my commitment to continuous learning, especially regarding new technologies and strengthening my English language skills.

Formation

- Computer systems and networks engineering** 2022 - presente
[Universidad Gerardo Barrios](#)
I am currently in the seventh cycle of the Computer Systems and Networks Engineering degree.
- Technical baccalaureate with public accounting option** ene 2019 - nov 2021
[Instituto Nacional Nueva Esperanza del Bajo Lempa](#)

Academic projects

Database manager

- Urban Footprints: is a web application designed to streamline pet shelter management, facilitating adoption management, donation tracking, and volunteer management. The platform allows users to browse available pets, register adoption requests, and make online donations.

Full Stack Developer

- Couples Game: A Visual Basic 2019 form project with C#, which consists of developing a game to form couples, with tools such as: label, tablelayoutpanel, and timer.

UX/UI Designer

- Boutique Scandal: A web-based boutique management system developed as an academic project. It allows you to manage products, search, and manage users through a simple web interface, using tools such as HTML, CSS, Python, Flask, and Django.

Achievements

- Recognition Certificate: First place at the IT Achievements Fair, in the Automation and Robotics category, with the project: Readers Without Direction.
- Recognition Certificate: Participation in the twelfth edition of the Latin American Congress on Informatics and Communications (CLIC 2022).
